12 Mo Net Absorption in SF

(258K)

Vacancy Rate

5.2%

12 Mo Rent Growth

-1.8%

After spiking in 2020 with the economic shutdown, the retail vacancy rate has held floating between 5% and 5.5% for the past two years. Currently, the vacancy rate rests at 5.2% and has been flat over the past year. New leasing activity has struggled to return to pre-pandemic figures and remains, reaching only 80% of the 2019 total in the past three years. The flat vacancy rate is a result of negative absorption and demolitions, as net absorption fell to -260,000 SF over the past year. However, that figure is deflated by a number of large closings within the market's malls, specifically 121,000 SF at the Somerville Town Center in Antioch and 61,000 SF at the Sunvalley Mall in Concord.

Annual retail rent growth continues to improve in 2022, off the lows seen in 2020, and average rental rates are above pre-pandemic levels. East Bay rent growth

averaged nearly 3.3% year-over-year gains for the past decade but has failed to meet those levels recently, down -1.8% over the past year. The effects of the pandemic brought significant operational challenges for many retail tenants leading to slowing leasing activity and negative net absorption.

Investment activity stalled in the aftermath of the pandemic but began to pick up again in 2022 but slowed significantly in 23Q1. Deceleration is evident and will likely continue throughout 2023 as interest rates continue to rise, limiting buying power of potential investors, eroding property values, and expanding cap rates. Pricing exploration is expected for at least the first half of the year as owners and potential investors work to find new footing.

KEY INDICATORS

East Bay retail vacancy has climbed significantly since the middle of 2018, with the effects of the pandemic exacerbating the already negative trend. Underperforming national retailers had announced store closures in the years leading up to the pandemic, and in 2022 more national tenants such as Bed Bath & Beyond, Tuesday Morning, and Part City, among others, contributed to occupancy losses. In 2022 moveouts came from a number of different properties with nearly 15 new vacancies of 25,000 Sf or more, all of which come in the market's more suburban areas like Walnut Creek and Concord. Large-scale vacancies in 2023 have centered around malls, bringing significant amounts of new space to the market.

The flurry of move-outs has since settled, and availabilities have been flat recently, with the metro rate currently registering 5.5% in 2023q2, despite negative

net absorption over the past year of -260,000 SF. The vacancy rate is above the national average of 4.9% but remains well below the highs set during Great Recession. A large portion of recent positive absorption comes from interactive users like Urban Air Adventure Park, which leased 53,000 SF in Concord/Pleasant Hill. Additionally, a Subaru dealership con Hayward/Castro Valley was completed in 22Q2, absorbing another 58,000 SF.

While new annual leasing activity is registering around 80% of pre-pandemic levels, making it challenging to recoup occupancy losses, especially quickly, a few outsized deals were completed recently. In 23Q1, 99 Cents Only Stores leased 24,000 SF at Somersville Center in Antioch, and Grocery Outlet took 21,400 SF at Shamrock Village in Dublin.

*Renewal

Asking rents started to rebound in 2022 after slowing at the onset of the pandemic. The average retail rent in the metro is currently registering \$32.00/SF, a significant premium over the national average of \$24.00/SF. The outlook for rents does improve in the forecast in the coming quarters, and consumer and retail spending has remained above pre-pandemic levels, which should help spur further demand.

More recently, rent growth has slowed, currently averaging -1.8% year-over-year, after averaging 3.3%

annually over the past decade. Rents are down across most product types across the East Bay.

High-rent areas for retail generally align with more affluent and high-cost areas for apartments and housing, like Danville/Alamo, Walnut Creek, Berkeley, Pleasanton, and San Ramon. Those also happen to be primarily suburban areas that saw positive population flow during the pandemic and, as such, are experiencing above-average rent growth.

MARKET RENT GROWTH (YOY)

MARKET RENT PER SQUARE FEET

Supply additions have been measured in the East Bay Metro, and the lack of construction is a silver lining that has kept market vacancy under control for the past few years. Some developers were active before the pandemic, with large-scale projects concentrated in affluent suburban areas like Walnut Creek, Dublin, San Ramon, and expanding suburban areas like Brentwood. Currently, there is only 250,000 SF under construction in the metro, adding 0.2% to inventory.

Gyms and supermarkets are currently the largest projects under construction around the East Bay. One of the biggest is Lifetime Athletic's new 75,000 SF health club located in downtown Walnut Creek in the Broadway Plaza shopping center. The stand-alone building is another addition to the super-regional mall, which underwent a significant renovation in 2016 and added a

freestanding Zara store adjacent to the under-construction Lifetime Athletic building.

Another noteworthy project is Plaza Gale Ranch Phase IV in San Ramon. The 125,000 SF neighborhood center is scheduled for a 2024 delivery. Developed by Toll Brothers out of Milpitas, California. The property will be adjacent to senior apartments with plans for a grocery anchor, although tenants are currently attached to the property.

With uncertainty surrounding population dynamics and income levels in the East Bay, development levels are unlikely to increase significantly in the near to medium term. Additionally, some construction materials can be difficult to source, affecting completion dates and putting the timing and viability of the project in doubt.

Sales activity over the past 12 months rests at \$895 million from 300 transactions, slightly above the five-year average of \$972 million. Transaction velocity slowed over the year as the effects of rising interest rates took hold.

One of the largest acquisitions of early 2023 was the sale of the Stoneridge Mall. The 365,000 SF super regional mall was sold for the land value, totaling 8.4 acres at \$16 million (\$44/SF). Shopoff Realty Investments out of Irvine bought the property for future redevelopment.

The largest acquisition in the back half of 2022 occurred in August when the six properties comprising Sand Creek Crossing in Brentwood sold for \$53 million (\$211 /

SF). Grovery-anchored centers remain highly desirable, even in an increasingly arduous lending environment making the transaction desirable to the new owner, LHB Investments out of San Jose. In addition to Raley's Supermarket, the center also houses TJ Maxx, Ross Dress For Less, and Home Goods.

Sales activity has been slow to start 2023 as higher interest rates start to take hold. It is worth noting that lenders no longer see retail as the risky asset class that it once did, improving terms slightly. With that said, a better risk profile will not shelter the market from macroeconomic trends. In addition to pricing erosion over the next 12 months, cap rates will expand as buyers seek to avoid purchasing depreciating assets.

The East Bay economy continues its quest to fully recover from the fallout caused by the coronavirus pandemic, which abruptly ended what had been the longest economic expansion in U.S. history. The East Bay and the broader Bay Area were more cautious and methodical regarding opening up the economy following shutdown measures. The majority of office employees continue to work remotely, but retail businesses have been able to reopen, fueling a more robust recovery in recent months.

According to the Bureau of Labor Statistics, employment in the East Bay metro fell by nearly 180,000 between March and April of 2020, or over 15%. To date, employment remains a few thousand jobs short of pre-pandemic levels.

Unemployment stood just above 3% in late 2022, down around 100 basis points from one year prior. The East Bay rate compares to 4.1% for California and 3.5% for the nation overall. As expected, leisure and hospitality continue to be the hardest hit sector, down approximately 10,000 jobs since before the pandemic, but having seen 14,000 people added to payrolls in 2022.

While employment gains pre-pandemic in San Jose and San Francisco were more robust, the East Bay has significantly outpaced national average employment growth. Median income gains have been substantial as well, climbing above \$100,000 and significantly outpacing the national average during the recent expansion. The East Bay benefited from the Bay Area's widespread, tech-led economic expansion from the Great Recession. Established tech players such as Workday, Lam Research, and Veeva Systems continued or expanded their East Bay presence. In addition, newcomers like fintech firms Square and Credit Karma, and startups like Pleasanton-based 10x Genomics, among others, grew around the metro. Oxford Economics estimates that job growth in the East Bay will continue outperforming the national benchmark by a healthy margin over the next five years.

Outside of the tech sector, the East Bay is home to the Port of Oakland, one of the busiest ports in the U.S. and a central economic force in the metro. The East Bay is

also the largest Bay Area industrial market, and major distribution tenants like Amazon and UPS have been expanding in the metro recently. The continued rise of e-commerce and the need for warehouse space and last-mile distribution facilities should benefit the East Bay economy and employment market.

Major U.S. research facilities Lawrence Livermore and Lawrence Berkeley National Laboratories and Sandia National Laboratories are located in the East Bay. In addition, the East Bay is home to major operations for a diverse set of large corporations. Significant employment in the healthcare industry in the East Bay includes healthcare systems Kaiser Permanente, Sutter Health, and John Muir Health, along with device and supplier companies like The Cooper Companies and Bio-Rad Laboratories. And auto manufacturer Tesla, oil giant Chevron Corp, and The Clorox Company are all headquartered in the East Bay, helping to drive the region's economy.

Looking from a broader perspective, continued real estate development and public transportation infrastructure projects already in the works will strengthen economic activity in the East Bay moving forward. Most notable is the considerable amount of apartment construction taking place throughout the market, mostly in transit-oriented projects. While these projects may face issues in the near term, the long-term outlook is for continued connectivity in the Bay Area's most affordable major metro for housing and office space.

BART's ongoing extension from the East Bay to San Jose is significantly expanding the number of commuting options for East Bay residents. Job centers in San Francisco, Downtown Oakland, and Pleasanton are becoming even more accessible from the southern portion of the East Bay. And once BART reaches San Jose, East Bay, residents can look for work in all the Bay Area's three major cities of San Francisco, Oakland, and San Jose. Simultaneously, the construction of new BART stations through the southern end of the East Bay is opening up pockets for transit-oriented residential and commercial development, unlocking the greater economic potential for the region as a whole.
