In the immediate aftermath of the pandemic, San Jose largely avoided the unprecedented collapse in tenant demand that emptied office buildings in neighboring San Francisco. However, low utilization of office space has been joined by a new challenge, as tech companies, faced with decreasing valuations and tighter availability of capital, look to reduce costs by laying off staff and cutting back on office space.

The vacancy rate in San Jose ticked up to 13.9% in the third quarter of 2023, having hovered around the 12% mark over the past year, and availability has risen to 19.0% as tenants add sublet space and developers bring to the market newly-built spaces in speculative projects. Recent months have also seen substantial space reductions by both Google and Meta in Mountain View and Moffett Park.

The relatively robust performance of San Jose's office market during the pandemic can be credited partly to the dispersed geography of the market. Office space is located in multiple employment centers throughout Silicon Valley, rather than being concentrated in a downtown central business district that relies on mass transit. Until last year, the market also benefited from strong growth and hiring by tech firms. Since then, layoff announcements by tech firms have resulted in thousands of job losses in Silicon Valley, although these are just a fraction of the global reductions that have occurred.

Development activity has continued at a high clip in San

Jose. However, it should be noted that a large proportion of new space has been self-build and preleased by major tech players such as Google, Adobe, and Apple and reflects long term campus expansions. Most office buildings delivered to the market in recent times were preleased. Developers and large owner/users are completing new office buildings to satisfy growing space needs that emerged in the 2010s expansion cycle. This pattern is now changing. While some projects nearing completion are spoken for, a growing number of active spec developments and several recently completed buildings have many spaces available for lease.

Weakening demand is also impacting rents, with average rent levels moving downwards over the past year, and rent growth is forecast to remain negative for the next several years.

Investment sales activity has slowed in the past year to about half its long term average. Up until fairly recently, high quality new properties with strong tenants were trading in excess of \$1,000/SF, keeping average market prices at their highest ever levels. However, no such deals have closed to date in 2023.

Looking ahead, continued uncertainty around weak tenant demand, elevated levels of speculative development, and the general economic slowdown present headwinds to both market performance and asset values.

## KEY INDICATORS

Current Quarter	RBA	Vacancy Rate	Market Rent	Availability Rate	Net Absorption SF	Deliveries SF	Under Construction

Sales Volume	\$1.2B	\$1.8B	N/A	\$5.3B	2021 Q4	\$176.3M	2009 Q3

The San Jose leasing market has slowed over the past year, impacted by the sharp rise in interest rates that has hit tech company valuations and led them to prioritize cost cutting over expansion. As of the third quarter of 2023, most major tech companies have enacted staff layoffs and announced reductions in leased office space. While these layoffs cut across national and global locations, Silicon Valley has seen thousands of job losses. And in terms of office absorption, the first months of 2023 have seen lease exits and downsizing outweighing new leasing activity.

An uptick in companies exiting leases or putting space on the sublet market has seen vacancy and availability rise over the past year. As of 2023q3 vacancy is 13.9% and the availability rate is 19.0%. Vacancy is projected to rise above 16% by the end of 2023 as new speculative space is delivered to the market. Sublease space availability currently stands at 7.2 million SF, an all-time high.

In the third quarter, both Google and Meta pulled out of several buildings in Mountain View and Moffett Park.

First, the 720,000-square-foot Moffett Green campus in Moffett Park hit the leasing market. Commonwealth Partners and CalPERS bought the four-building portfolio for \$867 million or \$1,200 per square foot in June 2022, at which time the entire campus was occupied by Meta on a lease than only started in January of that year. The

space formerly occupied by Meta is being marketed directly by the owners, which suggests Meta has paid to terminate the lease. Such a termination payment would run into hundreds of millions of dollars. In October 2022, Meta said it planned to incur \$2 billion to get out of office leases.

Then, another 1.3 million square feet of space across six buildings occupied by Google became available for sublease in Moffett Park and Mountain View. In Moffett Park, Google made available around 780,000 square feet of space across three buildings in Jay Paul's Moffett Towers complex. In Mountain View, Google added around 550,000 square feet of sublease space across three buildings at 600 Clyde Ave., 620 National Ave. and 750 Moffett Blvd.

Among other notable tenants giving back space, LinkedIn has made two buildings available for sublease in Sunnyvale, Cloudera has exited spaces in Palo Alto and Santa Clara, and Veritas has put two of the three floors it leases at Santa Clara Square on the sublet market. In Downtown San Jose, Sage Intact is subletting four floors at Riverside Towers.

One of a small number of tenants expanding its office presence is Pure Storage, a maker of data storage hardware and software, which subleased 328,000 SF in two buildings from Analog Devices in the Santa Clara Square complex.

Renewal

After holding up well during the pandemic, rent growth in San Jose has turned negative in the past year. As of the third quarter of 2023, average asking rents are -2.1% below where they were a year ago.

The current weakness in rents is a direct result of the economic headwinds facing tech companies. Rising interest rates have reduced tech company valuations and led to a focus on reducing costs, something many growing tech companies have never previously done. Cutting costs in the areas of staffing and real estate are high on the agenda for many office tenants. The resulting weakening of tenant demand, and the growth of cheap sublet space, are forcing landlords to offer lower rents. In addition, industry participants report that landlords are offering elevated concessions, including rent free periods

of up to 18 months and tenant improvement allowances of up to \$150/SF or more, in exchange for extended lease terms.

Current average market rates are \$60/SF on a full-service basis. While average rents are declining, San Jose remains one of the most expensive markets for office space in the nation. Higher-quality 4 & 5 Star product leases for an average \$66/SF, compared to the average across the US of \$45.00/SF for that subtype.

Going forwards, the potential for rent growth is expected to be constrained further by the addition of new speculative space that is currently under construction. Accordingly, positive rent growth is not forecast to return before 2027.

## MARKET RENT GROWTH (YOY)

## MARKET RENT PER SQUARE FEET

## 4 & 5 STAR EXPENSES PER SF (ANNUAL)

Market / Cluster	Utilities	Cleaning	Insurance	Taxes	Other	Total

Sunnyvale/Cupertino	\$0.66	\$0.62	\$1	\$5.60	\$1.65	<b>\$9.53</b>

Expenses are estimated using NCREIF, Trepp, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

San Jose is currently one of the more active markets in the nation for office development. As of the third quarter of 2023, 7.8 million SF of office space is under construction, representing 5.5% of the market's existing inventory, well above the national average of 1.5%. While speculative office projects have been quick to lease in the past, weakening demand from tech tenants in 2023 is presenting leasing challenges, particularly in Downtown San Jose, where much of the new product is set to deliver.

The active construction market has seen 1.3 million SF of new deliveries in the 12 months prior to 22Q3. Most of this activity has been owner-build or preleased projects for single tenants.

In 2023, Adobe took delivery of around 750,000 SF in its new Adobe Founders Tower in Downtown San Jose. Earlier, in 2022, Google completed its 1 million-SF Bay View Campus in Moffett Park, and is close to completing its nearby 600,000-SF Charleston East campus. In Sunnyvale, four single-tenant buildings were completed in 2022 for Nokia, LinkedIn, Apple, and Fortinet.

Downtown San Jose has the largest share of the current construction pipeline, at around 2 million SF. Developer Jay Paul Company is involved with several projects, including the 1.4-acre 200 Park Ave. site, on which a 937,000-SF office tower is underway. Across the street, Jay Paul has plans to redevelop the nine-building Cityview Plaza, which it acquired for \$284 million in 2018, into a 19-story, 3.4 million-SF mixed-use campus.

The weaker economic climate has led some developers to pause activity in Downtown San Jose. One of the most notable projects that is now on hold is Downtown West, Google's massive transit-oriented village near Diridon Station, which started site preparation work in 22Q3. As of the third quarter of 2023, the timing of vertical construction remains under review.

Meanwhile, Google continues to build out its campus space, with several projects underway, including Google Landings in Mountain View, and Google Caribbean in Moffett Park.

In common with most US markets, investment sales activity has slowed sharply over the past year as rising interest rates and economic uncertainty made investors cautious and deals difficult to price. As of the third quarter of 2023, both the number and volume of transactions that closed in the past year are around half the long term average.

Office sales volume in San Jose during the past 12 months on a dollar basis, \$1.2 billion, was well below the 5-year annual average of \$3.6 billion. The number of transactions in the past year was 110, which compares to a five-year average of 200.

Pricing was maintained somewhat by the transaction of several premium properties in 22Q4 for above \$1,000/SF. In November 2022, Drawbridge Realty paid \$193 million, or \$1,231/SF for 200 S Mathilda Ave. in Sunnyvale. The 157,000 SF property was built in 2021

and is leased to Uber. Also in Sunnyvale, Metzler Real Estate acquired the LinkedIn-occupied 684 W Maude Ave. in October 2022. The purchase price was \$222 million, or \$1,140/SF.

Year to date 2023 there have been 53 transactions, with a total sales volume of \$460 million, and an average sales price of \$534/SF. While some smaller sales have achieved prices above \$1,000/SF, most larger sales have seen lower rates. For instance, in June 2023, Preylock Holdings acquired 3333 Scott Blvd. in Santa Clara. The 245,000 SF building, leased to Applied Materials, sold for \$182.5 million, or \$745/SF.

Given the outlook for continued uncertainty around office utilization, the elevated vacancy caused by the extensive volume of new space being delivered to the market, and the general economic slowdown, pricing is projected to move downwards over the next two to three years.

As of the third quarter of 2023, the San Jose economy is facing headwinds, as rising interest rates force tech companies to cut costs and investors to reduce the amount of capital available for start-ups. Moreover, the collapse earlier in the year of Silicon Valley Bank made investors nervous and disrupted the flow of financing to businesses.

This is a change from the past few years, during which time tech companies recorded strong earnings growth, and employment recovered from losses incurred during the pandemic. Growth in demand for tech products and services led tech companies to hire rapidly during 2020 and 2021. By the middle of 2022, however, with demand softening, and under pressure to manage costs, employers started to initiate hiring freezes, staff layoffs, and office space reductions. Similarly, softening demand is leading retail and industrial tenants to reconsider expansion plans.

Many people left the Bay Area during the pandemic, as their lives and work were impacted by lockdowns and health concerns. In 2023, the metro's population is once again growing but remains -49,000 short of the total population of three years ago.

The rate of unemployment declined to a historical low of just 2.5% in the past year, reflecting high demand for workers. More recently, tech layoffs across Silicon Valley have caused unemployment to rise again, and this should provide some much-needed liquidity to the metro's job market.

San Jose and, more broadly, the Bay Area, has firmly established itself as the nation's largest and most prestigious market for tech companies. Highly educated,

STEM-field graduates (science, technology, engineering, and mathematics) flock to San Jose and the greater San Francisco Bay Area in pursuit of employment at one of the many leading tech companies or startups headquartered in Silicon Valley. As a result, the market boasts one of the highest rates of educational attainment in the country, with over 50% of its working-age population possessing a college degree, more than 1.5 times the national rate.

Despite the current economic headwinds facing the market, San Jose is expected to retain its position as a leading center for innovation and economic growth. Over the past ten years, San Jose saw an average annual increase in GDP of 8.3%, the highest rate among the largest 20 metro areas in the nation, and twice the US average.

Several factors led to San Jose's prominence in technology. The market is home to one of the nation's premier educational institutions, Stanford University, as well as San Jose State and several other large universities. In conjunction with the culture of innovation that Stanford and Silicon Valley foster, venture capital investment is a key component of the market's success. Technological advancements incubated locally are funded by the nation's largest collection of venture capital firms, many of which are located along Sand Hill Road in Menlo Park. The relationship between tech and venture capitalists in San Jose is symbiotic, with between 30% and 40% of total U.S. venture capital funding typically going to Bay Area-based companies. Venture capital funding to San Jose-based businesses reached a record level in 2021, but deal count and investment value have pulled back in the past year in response to higher interest rates and global economic uncertainty.
