As of the third quarter of 2023, the San Francisco apartment market is showing signs of stability after the volatility of recent years. Vacancy has levelled-off, albeit at a higher level than before the pandemic. Rent growth is generally flat, and construction activity has shifted from the city of San Francisco to the peninsula. Investment activity is muted, reflecting broader economic headwinds.

In 2020, when the pandemic hit and San Francisco went into an extended lockdown, many renters, who were already overwhelmed by the high cost of housing, took the opportunity to leave the city in search of less-expensive alternatives. Almost 10,000 units were vacated, as the vacancy rate increased to 11.3%, while market rents fell by 11%.

Moving into the second half of 2023, this loss of workforce and population has only partially recovered. Unlike most other markets in the Bay area, apartment demand in San Francisco is still below pre-pandemic levels. Vacancy in the second quarter is 6.5%, and rents are lower than they were in 2019.

Within the market, San Mateo County has enjoyed stronger demand than San Francisco County. Vacancy for 4 & 5 Star buildings is above 9% in San Francisco and below 6% in San Mateo. Moreover, average rent for this subtype in San Mateo County has recently moved above the San Francisco County average.

The trailing 12-month absorption for market-rate

apartments sits at 2,200 units, compared to the 10-year average of 2,100 units. Looking ahead, positive absorption is projected for the metro market, but the rate of improvement in areas close to downtown San Francisco will depend upon both a return to in-office working and improvements to safety and security. Social problems associated with homelessness, drug activity and crime are a significant disincentive to residents. The social problems are highly localized. In the words of one local property manager, "anything north of California Street is in high demand but neighborhoods to the south of that line I won't touch". There is additional uncertainty around employment, as tech companies implement hiring freezes and layoffs.

The trends in demand have also impacted new construction, with the focus shifting from San Francisco to the peninsula. There are now more units underway in San Mateo County than there are in San Francisco, with activity centered on transit-friendly redevelopment sites close to Caltrain stations. Although construction is muted in downtown San Francisco, many new developments have been approved and are ready to break ground once economic conditions are favorable. For example, the South of Market submarket alone has 25 proposed projects, with a total of more than 5,000 units.

In the investment market, sales activity has slowed substantially over the past year, as the effects of interest rate increases and economic uncertainty dampened investor interest.

KEY INDICATORS

| Current Quarter | Units | Vacancy Rate | Asking Rent | Effective Rent | Absorption Units | Delivered Units | Under Constr Units |
|-----------------------------|----------|-----------------------|---------------------|----------------|---------------------|-----------------|-----------------------|

| Asking Rent Growth (YOY) | -0.8% | 1.7% | 3.5% | 19.0% | 2001 Q1 | -11.6% | 2002 Q4 |
| Effective Rent Growth (YOY) | -0.6% | 1.7% | 3.5% | 19.0% | 2001 Q1 | -11.6% | 2002 Q4 |
| Sales Volume | \$1.6B | \$1.5B | N/A | \$3.1B | 2020 Q1 | \$314.5M | 2009 Q3 |

As of the third quarter of 2023 the apartment vacancy rate in San Francisco stands at 6.5%, and has been holding steady around this level for the past 12 months. While this is an improvement over the 2020 high of 10.9%, it remains above the pre-pandemic average of 5% to 6%. A multitude of factors, including population decline, remote working, and social problems related to homelessness and crime, have reduced demand across the metro area, with the largest impacts hitting neighborhoods in the heart of San Francisco.

Moreover, in alignment with national trends, demand and absorption have slowed in recent quarters in response to high inflation and rising interest rates, which have dampened renter activity and new household formation. Nevertheless, annual net absorption, at 2,200 units, is only slightly below the metro area's 10 year annual average of 2,200 units.

In 2020, the vacancy rate for high-end units reached nearly 20%. Since then, the return of some high-income renters has reduced 4 & 5 Star vacancy to 9.6%. Midlevel assets typically perform relatively well in San Francisco. In normal times, there is no shortage of demand for moderately priced options, but job losses

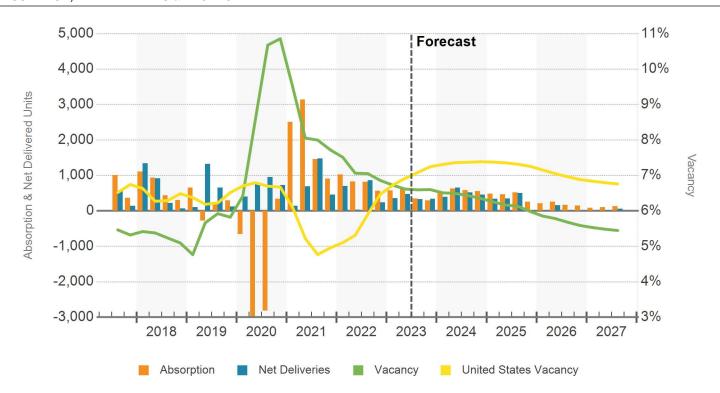

and relocations to other cities have negatively affected all segments of the market. Vacancy among 3 Star assets in 2023q3 registers near the market average at 6.1%, while 1 & 2 Star vacancy is currently 5.3%.

Among the submarkets with the highest vacancy rates are those that saw the greatest exodus of tech workers during the pandemic and those with the worst street-level social problems. These neighborhoods include parts of Downtown San Francisco, Haight-Ashbury/Castro/Noe Valley, and Civic Center/Tenderloin.

Demand is likely to remain muted compared to prepandemic levels. A large drop in the number of people working downtown has had a direct impact on the demand for apartments in neighboring areas, where proximity to the workplace is a prime attraction.

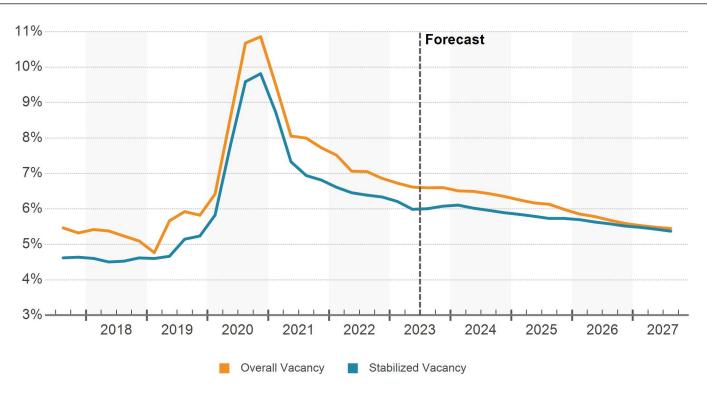

Overall, the apartment market continues to benefit from high single-family home and condo pricing, which creates a barrier to home ownership in the area. San Francisco's homeownership rate ranks among the lowest in the country at under 40%, and future housing development is expected to be predominantly concentrated in apartment properties.

ABSORPTION. NET DELIVERIES & VACANCY

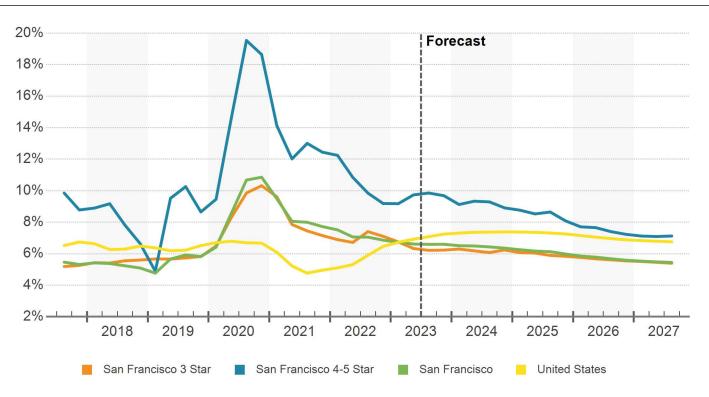

OVERALL & STABILIZED VACANCY

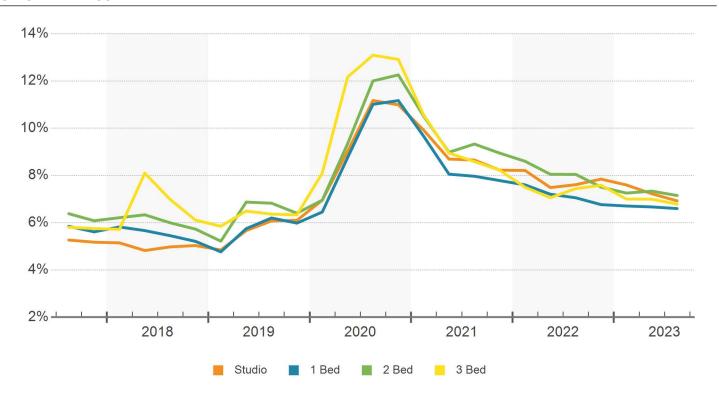

VACANCY RATE

VACANCY BY BEDROOM

Apartments rent for an average of \$3,030/month in San Francisco. As of the third quarter, this is the highest rate in the nation and reflects a history of strong demand for housing and a limited ability to increase supply. For-sale housing prices also rank among the highest nationwide.

However, rent growth has slowed in recent years, allowing the gap between San Francisco and other cities to narrow. Over the past three years, average annual rent growth in San Francisco was -0.2%, whereas the national average over this period was 5.0% per year. However, with the national average rent standing at just \$1,670/month, tenants still pay a large premium to rent in the city. In the past three years, affordability has improved as incomes have risen faster than rents.

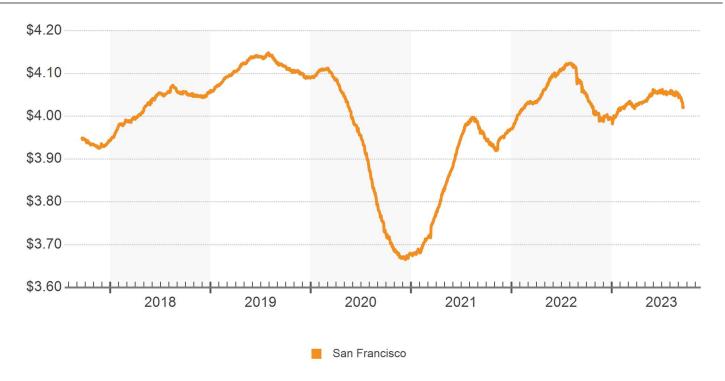

Rent growth hit a decade high of 7.6% in early 2022, before declining in the second half of the year. Annual rent growth as of 22Q3 is negative by -0.8%, and

average asking rates remain below the levels reached in 2019.

Asking rents are highest in Downtown San Francisco, Mission Bay and South of Market. These areas saw the largest levels of new construction in the 2010s, most of which was in the 4 & 5 Star category that commands the highest rents in the city.

Over the past decade, rent growth among mid-quality 3 Star properties outperformed 1 & 2 Star as well as 4 & 5 Star properties. As predominantly luxury properties were built in the development cycle, demand for middle-class housing remained overwhelming. For the year ending 22Q3, asking rents for properties rated 4 & 5 Star fell by -2.0% year over year, which compares to changes of -0.1% among 3 Star properties and 0.5% among 1 & 2 Star properties.

Expenses are estimated using NCREIF, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

The volume of new apartment completions in San Francisco has slowed. As of 2023q3, just 1,200 units delivered over the past year. This compares to the 5 year average of 2,300 units per year. However, the pace of new construction has picked up recently, and approximately 2,500 units are projected to be completed in calendar year 2023.

Almost all of the stock of market-rate units under construction is in 4 & 5 Star buildings. In total, there are 4,000 units underway. The under construction stock measures 2.2% of existing inventory, well below the average rate of 5.2% across the nation.

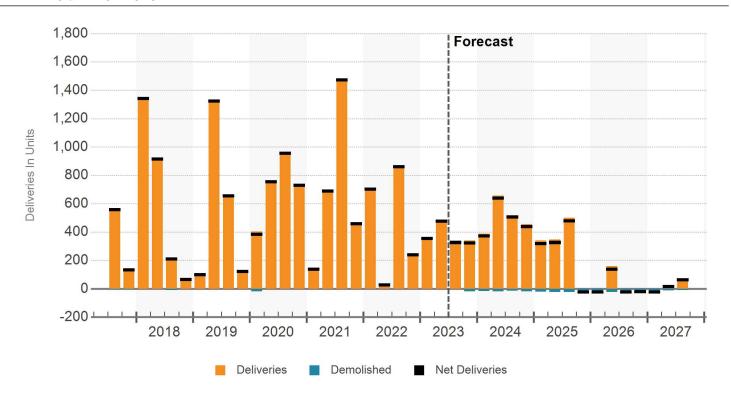

Geographically, development in the 2010s was concentrated in redevelopment areas close to downtown San Francisco, including South of Market and Mission Bay/China Basin/Potrero Hill. These areas have good access to the city's main centers for work and recreation, plus access to freeways and Caltrain, which provide transportation to major employment hubs in the Peninsula, Silicon Valley, and San Jose.

By contrast, much of the current construction pipeline is located to the south of San Francisco. Spurred by growth

in life sciences and biotechnology, new projects are clustered in Peninsula employment markets such as South San Francisco, San Mateo and Redwood City, which have emerged as popular locations for transitoriented development around Caltrain stations. Of the 2,500 units set to be delivered in 2023, 2,000 are located in these areas, with just 500 being delivered in the city of San Francisco. An example of a newer project of this type is Station 16 at Millbrae. This 320-unit mid-rise building was completed in February 2023, and, as of the third quarter, is 25% leased, with average asking rents at \$3.950/unit.

Although recent development has been robust in comparison to historical standards, San Francisco is generally more insulated from supply risk than most markets in the country. Stringent zoning, costly affordable housing requirements, NIMBY objection, and a lack of available land make the development process in San Francisco more arduous than in the vast majority of U.S. cities. As a result, supply growth over the past 40 years falls below most major U.S. markets on a percentage basis, despite strong demand for more housing.

Sales activity in San Francisco has been below the market's long-term historical average over the past few years. As of the third quarter of 2023, a total of 160 deals had closed within the past 12 months, somewhat below the five-year average of 320 transactions per vear. Investor interest remains subdued in 2023 after declining in the second half of 2022 in response to rapid increases in interest rates and uncertainty around the economic problems in San Francisco's office and retail markets.

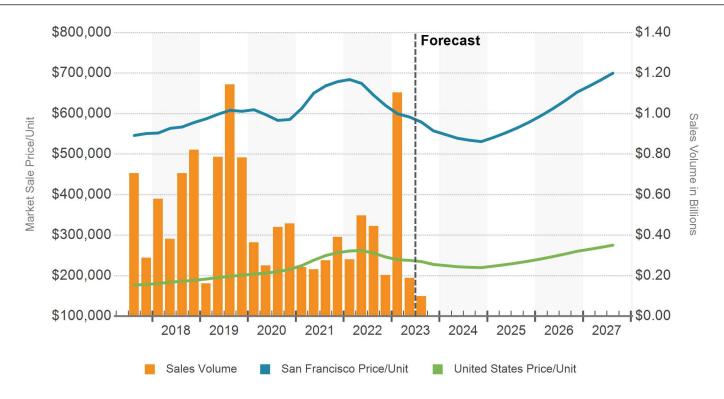

Historically, investors have been attracted to San Francisco's sound fundamentals and rent growth prospects. Development opportunities are limited, which gives buyers confidence that demand will outweigh supply in the long term, leading to improved operating income. With a fragmented and aged housing stock, opportunities to acquire core investment properties in

San Francisco are generally limited. However, current economic concerns are for the most part outweighing these considerations.

Most sales that have closed year to date in 2023 are 2 Star and 3 Star buildings in the 6 to 12 unit size range. The average sale price over the past year was \$320,000/unit, and buyers are mostly private individuals, although a few developers are also actively acquiring buildings.

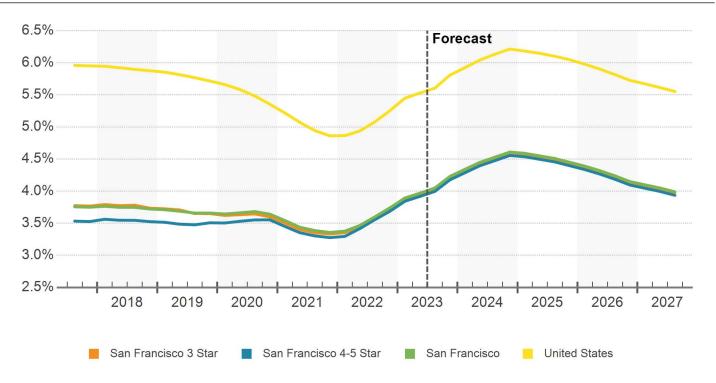

Total sales volume for the past 12 months, \$1.6 billion, reflects the impact of one large sale. In January 2023, the 2,983-unit Westlake Village in Daly City was acquired by Carmel Partners for \$925 million, or \$297,000/unit. The 3 Star Garden style community has an average rent of approximately \$2,500/unit.

Fom Gold Rush to Dot-Com, the San Francisco economy has a long history of boom followed by bust. And the current iteration of this cycle may prove to be the most dramatic. The tech boom of the 2010s, fed by the world's appetite for new mobile technologies, brought tremendous demand from expanding tech companies for office space, and a growing workforce that needed housing. Real estate prices increased rapidly to among the highest in the nation, prompting a construction boom across the city. In 2020, the COVID-19 pandemic abruptly halted that pattern. Tech companies quickly adapted to remote working, while their workforce left the city in large numbers. Three years on, in the disrupted real estate markets, demand remains low and prices are adjusting.

San Francisco is one of three major markets—the others being the East Bay and San Jose—that together, comprise most of the San Francisco Bay Area. The Bay Area is one of the largest metropolitan areas in the U.S., with a total population of 9.5 million, and is a major gateway city and generator of economic growth. The San Francisco market comprises San Francisco and San Mateo counties and is home to 1.6 million people. The major center for business activity is the Financial District in Downtown San Francisco. Major industries include information and communications technology, professional and business services, and tourism.

The COVID-19 pandemic triggered an economic downturn that disrupted San Francisco's core economic base and impacted the performance of key commercial real estate sectors. Most notably, the slow pace of a return to in-office working in Downtown San Francisco has impacted the viability and value of downtown office properties and had negative impacts on local businesses. Data from office key card usage and transit activity on BART show that San Francisco has one of the lowest

return-to-office levels of any major market in the nation. Reflecting this fall in activity, office vacancy levels have escalated, particularly in the Financial District and South Financial District, which are the core submarkets that contain the bulk of San Francisco's 4 & 5 Star office space.

The high cost of living led to a decline in San Francisco's population prior to 2020, but the pandemic accelerated this trend, with the population falling by -5.1% at the height of the pandemic. Recently, some of these losses have been recovered. Nevertheless, the metro still has -110,000 fewer people than it did five years ago.

Total employment has recovered and is now slightly ahead of where it was pre-pandemic. However, employment growth has been constrained by outward migration and a fall in the labor market participation rate. After falling to a 10-year low of 2.3% in 2022, the unemployment rate has increased to 2.9% in 2023q3. Layoffs in the technology sector have improved liquidity in the tight employment market but have also contributed to some weakening of demand in residential and retail markets.

Innovation in life sciences and biotechnology has driven growth in areas such as South San Francisco, and prompted developers to move forward with a range of lab space, R&D space, and residential construction projects. That said, delivery of life science projects is occurring at a time when businesses are cutting back on capital commitments, as high interest rates impact company valuations and dampen interest from venture capital and other investors.

Future tech growth in new areas such as AI is expected to remain focused in the Bay Area, and is expected to drive the economy forward over the coming years.
