# <u>Overview</u>

# **East Bay Office**

12 Mo Deliveries in SF

12 Mo Net Absorption in SF

Vacancy Rate

12 Mo Rent Growth

The East Bay office market has been hit hard over the past several years. The vacancy rate has risen dramatically over the past three years as leasing activity cooled and numerous tenant moveouts resulted in substantial occupancy losses. The increases have pushed the vacancy rate to 14.0%, the highest point since the previous peak set in 11Q1.

Increasing available inventory is driven by persistent negative demand, which has fallen to -2.4 million SF over the past year, with negative demand in every quarter but three, going back to the start of 2020. Oakland is facing headwinds on two fronts. First, the tech tenants spilling over from San Francisco have entirely dried up. Many of these firms have pivoted to differing real estate strategies, primarily looking to reduce their real estate costs either through a reduction in space, relocation or both.

Prolonged periods of negative demand have put downward pressure on lease rates, which have fallen by

14.0%

-1.0%

-1.0% over the past year and -3.1% over the past three years. Property owners are increasingly concerned with maintaining occupancy and are willing to offer discounts as well as concessions in order to achieve it. Rents are down the most in 4 & 5 Star properties, falling by -2.9% over the past year.

Unsurprisingly, poor demand, high vacancy, and falling rents have led to almost a complete pullback in construction activity. Currently, there is only 54,000 SF underway. The two projects are both build-to-suit and will not affect market availability today.

Recent sales activity has slowed significantly in recent months totaling \$217 million from 110 transactions, a farsight from the average over the past five years of \$1.7 billion. Office assets are declining in value from elevating vacancy rates, falling rents, and rising interest rates. Value erosion is prevalent in the office sector, and the East Bay has been particularly hard hit with little relief expected in the near to medium term.

### **KEY INDICATORS**

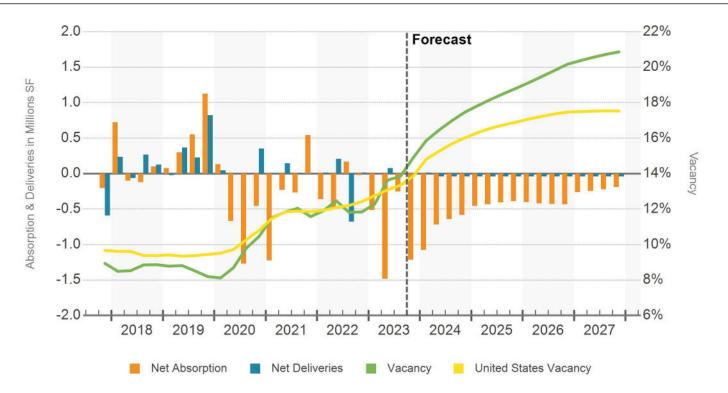

Market vacancy in the East Bay, currently 14.0%, the highest point since 11Q1. Sourcing tenants has become extremely difficult, and net absorption has fallen to -2.4 million, with negative activity concentrated in 4 & 5 Star properties. Oakland has not been not immune to the downsizing and relocating that is prevalent across the nation. Tenants are taking the opportunity to reevaluate their space requirements. As a result, many occupiers are giving back between one-third and one-half of their space and relocating within the market. Additionally, the demand from tech tenants spilling over from San Francisco has completely dried up, leaving few options to fill the void.

Leases have been noticeably smaller in 2023. Since the start of the year, only five leases have signed for 25,000 SF or more, the largest of which was for 50,000 SF. The staffing firm VACO signed that deal in May at 2623 Camino Ramon in San Ramon. Two of the remaining large leases were to medical tenants as UCSF took 31,000 SF at 3100 San Pablo Ave. in Berkeley and Delta

Dental leased 25,000 SF at 1333 Broadway in Downtown Oakland.

Sublease availability rests at 2.7%, slightly ahead of to the national figure of 2.5%. Most of the space currently hitting the market is direct, as the sublease is comparable to levels in early 2021. More than forty buildings are in the market with at least 100,000 SF available. The large blocks of space are a result of the large tenants that had previously occupied the market, a downside of the market's reliance on the tech sector for occupancy, and the 1.6 million SF added to the market over the past five years.

There is little reason to think there is much change coming in the near term. Office tenants will likely continue reducing their office footprint until the end of 2024. Five-year leases signed in 2019 will not expire until then, meaning occupancy levels are expected to contract at least until then.

Renewal

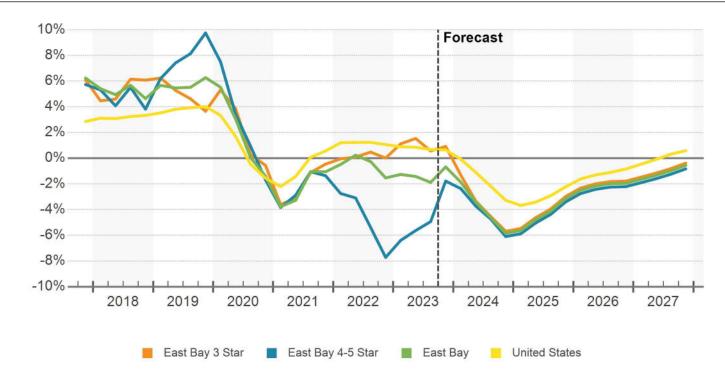

Rents in the East Bay are down year over year, falling by -1.0%. Office rents have been falling consistently over the past few years as tech tenants have closed offices and other users have reduced their office footprints and relocated. At the same time, concessions and lease terms have become increasingly generous for tenants, reaching as high as month of free rent per year of term and turn-key TI packages in some cases.

Before the pandemic, the East Bay was ranked among the country's strongest metros in rent growth. Vacancy rates were historically low, with robust demand from tenants. The East Bay saw average annual rent growth of 4.6% over the past decade, well above the national average of 2.7%, a far cry from the current state of the market. Leases in downtown Oakland still command a sizeable premium over the balance of the market. In January, Ramboll signed for 9,200 SF at the 5 Star office building located at 1111 Broadway for \$6.00/SF per month on a full-service gross basis. This is a significant premium over the market average of \$38.00/SF, a 10% premium over the national average. The deal was for seven years and was signed after the space sat on the market for 44 months.

In contrast, NCE leased 7,000 SF at 1003 W Cutting Blvd. in Richmond in April. The Reno-based engineering firm signed at the 3 Star building for a seven-year term at \$2.60/SF per month on a full-service gross basis.

# 1 & 2 STAR EXPENSES PER SF (ANNUAL)

| Market / Cluster   | Utilities | Cleaning | Insurance | Taxes  | Other  | Total  |
|--------------------|-----------|----------|-----------|--------|--------|--------|
| East Bay           | \$0.65    | \$1.21   | \$0.31    | \$4.20 | \$1.99 | \$8.36 |
| 680 Corridor North | \$0.59    | \$1.23   | \$0.35    | \$4.12 | \$3.42 | \$9.71 |
| 680 Corridor South | \$0.50    | \$1.03   | \$0.35    | \$4.52 | \$3.60 | \$10   |
| 80 Corridor        | \$0.74    | \$1.29   | \$0.16    | \$4.85 | \$0    | \$7.04 |
| 880 Corridor       | \$0.61    | \$1.05   | \$0.35    | \$4.16 | \$2.01 | \$8.18 |
| Highway 4          | \$0.73    | \$1.27   | \$0.16    | \$2.84 | \$0.10 | \$5.10 |
| Oakland            | \$0.73    | \$1.38   | \$0.37    | \$4.26 | \$2.52 | \$9.26 |

Expenses are estimated using NCREIF, Trepp, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

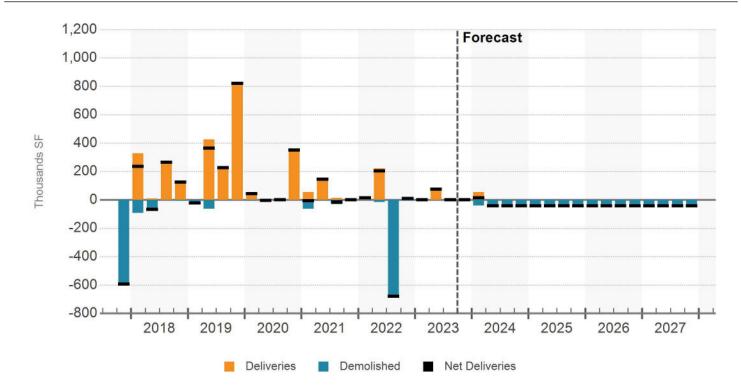

Despite relatively healthy fundamentals over the past decade, developers have been measured in adding new office inventory to the East Bay market. In the years prior to the pandemic, builders preferred projects in San Francisco and San Jose, where demand and rent growth have been more robust. As a result, East Bay has only added around 4.5 million SF of new office space since 2010. Even adding in the few projects currently under construction, the East Bay has increased its total inventory by just over 4% over the past decade.

As expected, there is only 54,000 SF under construction. This is comprised of two buildings, the largest of which is the Fremont Bank building, a 35,000 SF 4 Star property that is expected to complete before the end of 2023. Both of the buildings will be fully occupied upon completion, not impacting the market's vacancy or availability rates. The most recent completion of note was The Key at 12th, a glass tower totaling 320,000 SF, which broke ground in 2018 and was delivered in 20Q4. Ellis Partners and Intercontinental Real Estate purchased the development site in March 2017. University of California's Office of the President preleased 130,000 SF, and Credit Karma has preleased 160,000 SF. Today, the property remains near full occupancy, with only ground-floor retail available for lease.

Office construction will be rare for some time, except for the occasional build-to-suit property. The East Bay market has never been known for large-scale speculative construction, and the vacancy rate of 14.0% is far too high to justify adding inventory to the market anytime soon. Additionally, construction financing costs have risen with interest rates necessitating higher lease rates than those in 2019, during a time when office rents have compressed.

| Pro | perty Name/Address                 | Rating | Bldg SF | Stories | Start    | Complete | Developer/Owner           |
|-----|------------------------------------|--------|---------|---------|----------|----------|---------------------------|
| 1   | Fremont Bank<br>39150 Fremont Blvd | ****   | 34,905  | 6       | Oct 2021 | Dec 2023 | -<br>MIG Real Estate, LLC |
| 2   | 1680 14th St                       | ****   | 18,825  | 1       | Mar 2023 | Dec 2023 | -                         |

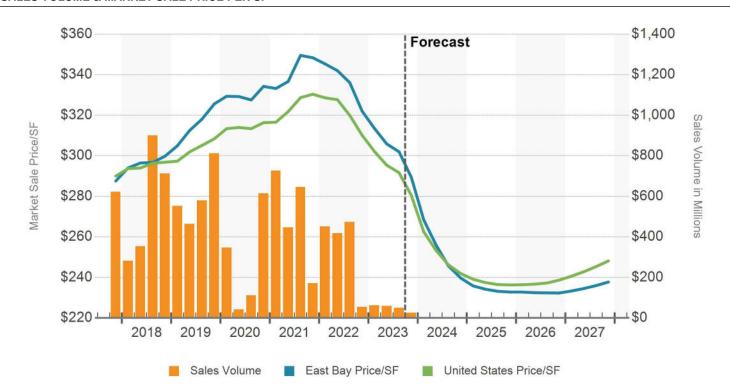

Office transaction volume during the past 12 months in the East Bay, at \$217 million from 110 transactions, far below the market's 10-year annual average of \$1.7 billion, demonstrating investors are less willing to take positions in the market and the threat of foreclosures have begun to drive market activity.

The largest transaction of 2023 by far was the \$33.2 million (\$278/SF) acquisition of Plaza 360 in Downtown Oakland. The property was sold in lieu of foreclosure. Despite renovations in 2008, the property was only 40% leased at the time of sale and was unable to service its debt. The balance of activity has been much smaller. Only two other sales have exceeded \$10 million, neither of which reached \$15 million.

The East Bay saw robust asset price growth from

2013–2019, but since early 2020, pricing has faltered. Values are discounted compared to both the San Francisco and San Jose office markets. However, rising interest rates, higher vacancy rates, and will hamper sales, reducing buyers' willingness to pay for an already high-risk asset class, resulting in some trades below \$80/SF, an unheard-of price just a few years ago. More pricing erosion is likely in the coming periods. The lending environment is significantly more expensive and difficult to navigate. In addition to interest rates going up, lenders are wary of transacting on office properties. The trades that are closing require significantly more equity. The office sector has by far been the hardest hit out of all commercial real estate property types. Leasing will likely remain depressed through the end of 2024, resulting in a prolonged recovery for property values.

The East Bay economy continues its quest to fully recover from the fallout caused by the coronavirus pandemic, which abruptly ended what had been the longest economic expansion in U.S. history. The East Bay and the broader Bay Area were more cautious and methodical regarding opening up the economy following shutdown measures. The majority of office employees continue to work remotely, but retail businesses have been able to reopen, fueling a more robust recovery in recent months.

According to the Bureau of Labor Statistics, employment in the East Bay metro fell by nearly 180,000 between March and April of 2020, or over 15%. To date, employment remains a few thousand jobs short of prepandemic levels.

Unemployment stood just above 3% in late 2022, down around 100 basis points from one year prior. The East Bay rate compares to 4.1% for California and 3.5% for the nation overall. As expected, leisure and hospitality continue to be the hardest hit sector, down approximately 10,000 jobs since before the pandemic, but having seen 14,000 people added to payrolls in 2022.

While employment gains pre-pandemic in San Jose and San Francisco were more robust, the East Bay has significantly outpaced national average employment growth. Median income gains have been substantial as well, climbing above \$100,000 and significantly outpacing the national average during the recent expansion. The East Bay benefited from the Bay Area's widespread, tech-led economic expansion from the Great Recession. Established tech players such as Workday, Lam Research, and Veeva Systems continued or expanded their East Bay presence. In addition, newcomers like fintech firms Square and Credit Karma, and startups like Pleasanton-based 10x Genomics, among others, grew around the metro. Oxford Economics estimates that job growth in the East Bay will continue outperforming the national benchmark by a healthy margin over the next five years.

Outside of the tech sector, the East Bay is home to the Port of Oakland, one of the busiest ports in the U.S. and a central economic force in the metro. The East Bay is also the largest Bay Area industrial market, and major distribution tenants like Amazon and UPS have been expanding in the metro recently. The continued rise of ecommerce and the need for warehouse space and lastmile distribution facilities should benefit the East Bay economy and employment market.

Major U.S. research facilities Lawrence Livermore and Lawrence Berkeley National Laboratories and Sandia National Laboratories are located in the East Bay. In addition, the East Bay is home to major operations for a diverse set of large corporations. Significant employment in the healthcare industry in the East Bay includes healthcare systems Kaiser Permanente, Sutter Health, and John Muir Health, along with device and supplier companies like The Cooper Companies and Bio-Rad Laboratories. And auto manufacturer Tesla, oil giant Chevron Corp, and The Clorox Company are all headquartered in the East Bay, helping to drive the region's economy.

Looking from a broader perspective, continued real estate development and public transportation infrastructure projects already in the works will strengthen economic activity in the East Bay moving forward. Most notable is the considerable amount of apartment construction taking place throughout the market, mostly in transit-oriented projects. While these projects may face issues in the near term, the long-term outlook is for continued connectivity in the Bay Area's most affordable major metro for housing and office space.

BART's ongoing extension from the East Bay to San Jose is significantly expanding the number of commuting options for East Bay residents. Job centers in San Francisco, Downtown Oakland, and Pleasanton are becoming even more accessible from the southern portion of the East Bay. And once BART reaches San Jose, East Bay, residents can look for work in all the Bay Area's three major cities of San Francisco, Oakland, and San Jose. Simultaneously, the construction of new BART stations through the southern end of the East Bay is opening up pockets for transit-oriented residential and commercial development, unlocking the greater economic potential for the region as a whole.
