After struggling to retain tenants from 2019 to 2022, retail demand increased in 2023, resulting in the only positive net absorption figure in the past five years. Over the past year, demand has risen to 260,000 SF, the highest annual figure since 2017. New leasing activity has struggled to return to pre-pandemic figures and remains low, reaching only 80% of the 2019 total in the past three years. The positive demand figure remains despite a number of large-scale closures in the market, including 49,000 SF at the Somerville Town Center in Antioch and 50,000 SF at the power center Pinole Vista Crossing.

Contraction during the pandemic runs counter to many national trends, as retail sales accelerated and the pace of store closures slowed. Retailers left the market at the same time as residents who sought a lower cost of living in other markets. The local reduction in retail spending caused significant expansion of the availability rate from a low point in 18Q3 of 3.99% to a peak of 6.25% in 21Q1. Since that time, availability has fallen to its current level of 5.7%.

As demand has waned and the availability rate increased, the market has been right-sizing, and inventory has fallen by 43,000 SF over the past five

years. Numerous retail properties have been torn down and replaced with higher and better uses. Current construction activity is relatively low, with just 310,000 SF underway. Around 90% of that figure comes from a new Costco in Newark and a new neighborhood center in San Ramon, both of which will deliver fully occupied.

Rents are falling in the market, down -0.6% over the past year, the lowest point since 11Q1. Asking rents have fallen across all submarkets but are most pronounced in Oakland, which has recorded annual declines of 4% or more. The eastern suburbs are performing better, with a number of submarkets, including Emeryville, posting only slightly lower rents than a year ago.

Sales volume has reached only \$570 million from 220 deals over the past 12 months, a far cry from the \$940 million averaged over the past five years. Investment activity in 2023 is only 40% of the 2022 total, which was the highest figure of the past decade. Deceleration is evident, and levels are unlikely to increase significantly throughout the rest of 2023 as interest rates continue to rise. Pricing exploration is expected for at least the first half of the year as owners and potential investors work to find new footing.

The East Bay's retail market recorded positive demand figures in 2023 for the first time in four years, and availability fell below 4%. The market had not recorded more than one year of negative net absorption for the balance of the 21st century. Poor demand during this time runs counter to national trends, which saw an increase in consumer spending and improving retail margins. The return of tenant interest in 2023 is likely tied to the retention of the market's population; many left the area during the lockdown and in subsequent periods, but that trend has halted, increasing retailer perception of the market. Over the past year, net absorption reached 260,000 SF, and the availability rate fell to 5.7%.

The improving retail market has not been ubiquitous across the market, and certain pockets have outperformed. Three submarkets have all topped 100,000 SF in demand throughout the year: Hayward/Castro Valley, Antioch/Pittsburg, and Walnut Creek-BART/DT have all performed very well. All three locations are well-located, affluent communities that appeal to differing populations. Historically strong performers like Dublin, Pleasanton, and Livermore have struggled to keep pace, posting middling figures, with the exception of Pleasanton, which witnessed 120,000 SF worth of tenants leave the market.

Center type is playing a large role in sourcing tenancy. Traditional shopping centers are struggling to hold on to tenants. Power centers, for example, have a marketwide availability rate of 10.1%, comparable to those seen

in the East Bay's malls. Similarly, neighborhood centers are seeing an availability rate of 7.0%, while general retail and strip centers are well below 5% across the market. This trend may continue for some time, as many large retailers have announced plans to relocate to properties with superior foot traffic.

Despite the positive demand numbers, leasing activity has fallen to the lowest levels seen since 2010. Falling demand has been linked to a pullback in consumer spending, alongside increases in operational overhead. As a result, leasing of the market's big box spaces has been sporadic and highlighted by discount retailers. Only four transactions surpassed 25,000 SF, the largest two of which were by discount retailers, Marshalls in El Cerrito and 99 Cents Only Store in Antioch.

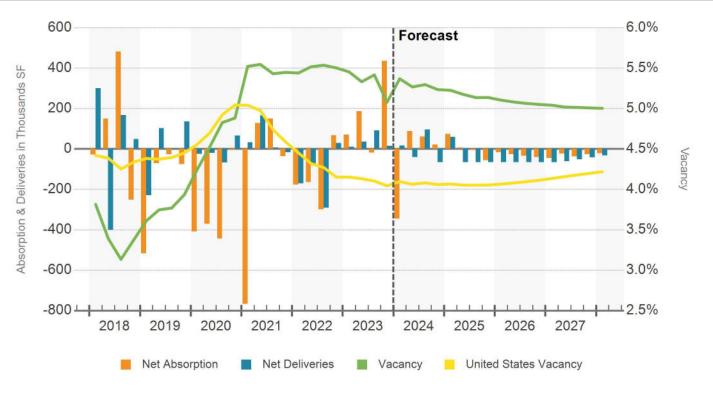

Lack of activity in the market's largest spaces means that nearly two-thirds of leasing in 2023 came in spaces of 5,000 SF or smaller. Restaurants and fitness users were the most active tenant types, but retailers like Sephora, which typically take larger footprints, are leasing smaller spaces in the market.

The near-term forecast calls for additional slowing of leasing activity, but net absorption is expected to remain positive, as large-scale retailer closures are not expected to increase in the near term. However, tenants are expected to remain focused on the market's most affluent areas for future expansion.

^{*}Renewal

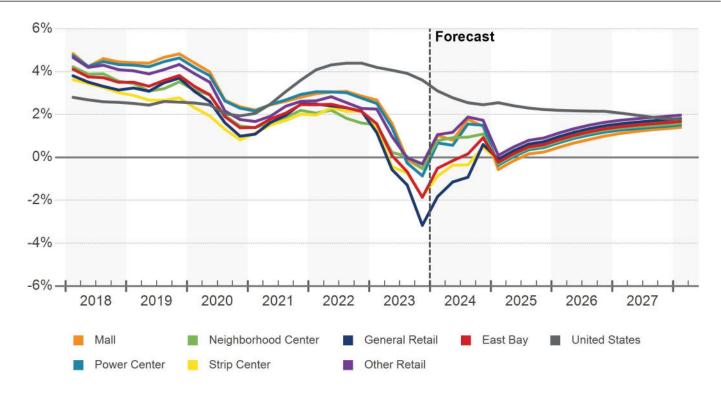

Retail rents in the East Bay have fallen by -0.6% over the past year, the lowest point since 11Q3. Years of tenants leaving the market, repurposing inventory, and declining demographics have made it difficult for property owners to hold rent levels constant. Additionally, retailers are facing pressure from declining retail sales and rising operational costs, putting pressure on margins.

Rental rates have fallen across the entire market, with no one submarket posting positive rent growth over the past year. With that said, some areas have been hit harder than others. The region's more affluent suburbs have fared better, with areas like Emeryville, Antioch/Pittsburg, and Bishop Ranch recording rents falling by less than 1%. In contrast, areas located closer to the market CBD in the heart of Oakland and nearby Berkeley have recorded rents falling by 4% or more.

Similar to submarket activity, rents have fallen regardless of retail center type. Surprisingly, the market's malls have been one of the best-performing segments, with rents down by just 0.9% over the past year, a departure from national trends, which have seen malls struggling. Neighborhood centers are performing similarly well but slightly off the pace, falling by 0.7% during the past year. Performance of a given asset is closely tied to its location and the surrounding population, leading to significant variance within the market.

Market rents are forecast to slowly improve in coming periods but are not expected to return to positive territory until mid-2025. The East Bay market faces challenges on many fronts, and it will take some time before it can fully recover.

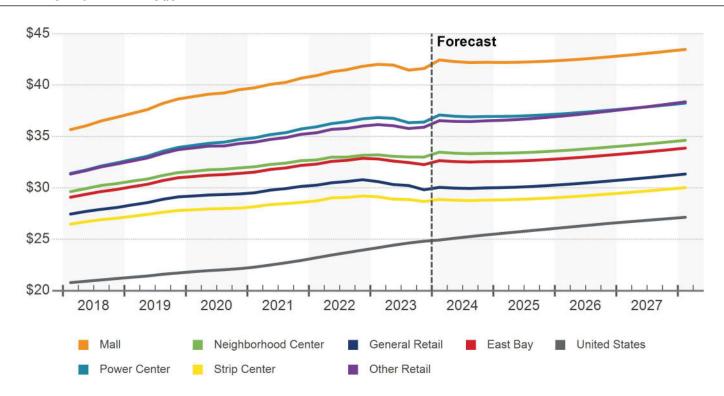

MARKET ASKING RENT GROWTH (YOY)

MARKET ASKING RENT PER SQUARE FEET

A primary factor in falling availability has been limited development in the East Bay, combined with repurposing of existing retail assets into other uses. The market has lost retail inventory in 2020 and again in 2022, leading to a change of 43,000 SF in inventory over the past five years. The pendulum has swung back the other way over the past year, with 160,000 SF coming to market. Recent deliveries are primarily small, build-to-suit properties. Of those delivered in 2023, only 10% of the inventory is vacant, and just one is 10,000 SF or greater, a 75,000-SF expansion of Broadway Plaza in Walnut Creek for Lifetime Athletic.

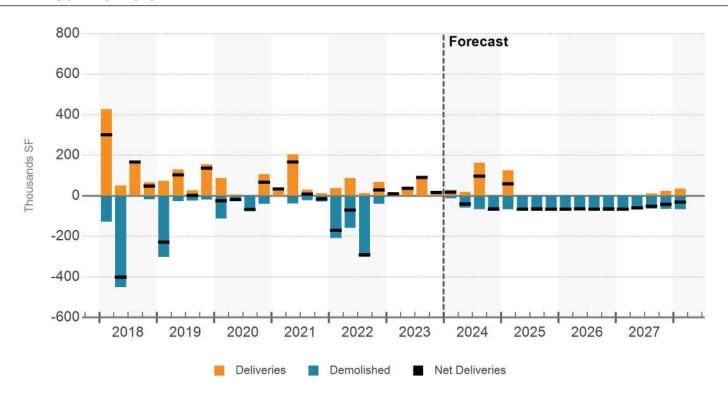

Geographically, the 310,000 SF currently under construction is distributed throughout the suburbs, with the largest projects located south and east of the urbanized areas of Oakland and Berkeley. The largest project underway is a 162,000-SF Costco adjacent to the Newpark Mall. The project is expected to come on line in 24Q1. The other is Plaza Gale Ranch Phase IV, a 125,000-SF neighborhood center in the San Ramon

Submarket that is scheduled to complete in 24Q4. Toll Brothers, out of Milpitas, California, is developing the property adjacent to senior apartments with plans for a grocery anchor.

New construction poses little risk to the East Bay's availability, as new developments will add just 0.2% to market inventory, 95% of which will deliver occupied. The few projects that will come to market vacant are typically ground-floor retail of a mixed-use development, typically multifamily. The only new shopping center underway in the market is the aforementioned Plaza Gale Ranch.

Development is forecast to be limited in the coming quarters, as high construction and financing costs persist. Additionally, there are questions surrounding the market's demographics and whether the highly paid labor force that helped fuel growth in recent years will return to the market—and how many of the employees that left might return.

Sales activity over the past 12 months rests at \$570 million from 220 transactions, a far cry from the five-year average of \$940 million. Transaction velocity slowed over the year as the effects of rising interest rates took hold, and rents have continued to fall.

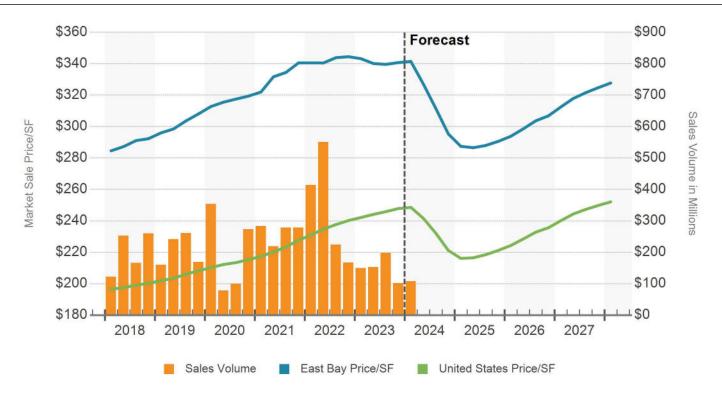

One of the most interesting acquisitions of 2023 was the sale of the Stoneridge Mall. The 365,000-SF super regional mall was sold for the land value, totaling 8.4 acres, at \$16 million (\$44/SF). Shopoff Realty Investments out of Irvine bought the property for future redevelopment. This is in keeping with recent trends in the market, where existing retail was purchased and then repurposed.

More recently, in September, San Diego-bas Tourmaline Captial purchased Pacific Pearl Shopping Center in

Pleasanton. The 111,000-SF neighborhood center was built in 2017 and in comprised almost exclusively of food users, highlighted by two grocers, 99 Ranch Market and Chinese & Pan-Asian Supermarket. The site was purchased for \$48.2 million (\$436/SF) and was 99% occupied at the time of sale.

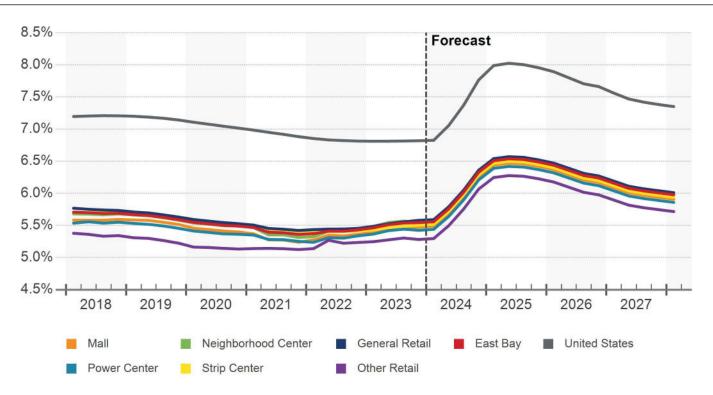

Sales activity in 2023 is less than half of the 2022 total, as the effect of higher interest rates and lagging rent growth have taken hold. It is worth noting that lenders no longer see retail as the risky asset class they did in 2020 and early 2021. With that said, a better risk profile will not shelter the market from macroeconomic trends. In addition to pricing erosion over the next 12 months, cap rates will expand as buyers seek to avoid purchasing depreciating assets.

The East Bay economy has fully recovered from the fallout caused by the coronavirus pandemic, which abruptly ended the longest economic expansion in U.S. history. The East Bay and the broader Bay Area were more cautious and methodical regarding opening up the economy following shutdown measures. As retail businesses continued to reopen, the recovery picked up more steam in 2022 and 2023. According to the Bureau of Labor Statistics, employment in the East Bay metro fell by nearly 180,000 between March and April 2020, or over 15%. To date, employment now exceeds prepandemic levels by approximately 31,000 jobs.

Unemployment stood at 4.5% in late 2023, up around 150 basis points from one year prior. The East Bay rate compares to 5.1% for California and 3.7% for the nation overall. The construction, leisure and hospitality, and education and health services sectors have posted the most robust annual gains by percentage across the region, with growth in the 5% to 6% range. Leisure and hospitality payrolls continue to inch closer to the prepandemic mark, with just under 6,000 people added to payrolls in 2023.

While employment gains pre-pandemic in San Jose and San Francisco were more robust, the East Bay has significantly outpaced national average employment growth. Median income gains have also been substantial, climbing above \$100,000 and significantly outpacing the national average during the recent expansion. The East Bay benefited from the Bay Area's widespread, tech-led economic expansion from the Great Recession. Established tech players such as Workday, Lam Research, and Veeva Systems continued or expanded their East Bay presence. In addition, newcomers like fintech firms Square and Credit Karma and startups like Pleasanton-based 10x Genomics, among others, grew around the metro. Oxford Economics estimates that job growth in the East Bay will continue outperforming the national benchmark by a healthy margin over the next five years.

Outside of the tech sector, the East Bay is home to the Port of Oakland, one of the busiest ports in the U.S. and a central economic force in the metro. The East Bay is also the largest Bay Area industrial market, and

significant distribution tenants like Amazon and UPS have been expanding in the metro recently. The continued rise of e-commerce and the need for warehouse space and last-mile distribution facilities should benefit the East Bay economy and employment market.

Major U.S. research facilities, Lawrence Livermore and Lawrence Berkeley National Laboratories and Sandia National Laboratories are located in the East Bay. In addition, the East Bay is home to primary operations for a diverse set of large corporations. Employment in the healthcare industry in the East Bay includes healthcare systems Kaiser Permanente, Sutter Health, and John Muir Health, along with device and supplier companies like The Cooper Companies and Bio-Rad Laboratories. Tesla maintains a large manufacturing plant in Fremont, which is a hub for the auto giant's Model S, Model 3, Model X, and Model Y production. Additionally, The Clorox Company is headquartered in the East Bay, with offices at 1221 Broadway in Downtown Oakland.

Looking from a broader perspective, continued real estate development and public transportation infrastructure projects already in the works will strengthen economic activity in the East Bay moving forward. Most notable is the considerable amount of apartment construction throughout the market, primarily in transit-oriented projects. While these projects may face issues in the near term, the long-term outlook is for continued connectivity in the Bay Area's most affordable major metro for housing and office space.

BART's ongoing extension from the East Bay to San Jose significantly expands the commuting options for East Bay residents. Job centers in San Francisco, Downtown Oakland, and Pleasanton are becoming even more accessible from the southern portion of the East Bay. Once BART reaches San Jose, East Bay residents can look for work in the Bay Area's three major cities of San Francisco, Oakland, and San Jose. Simultaneously, constructing new BART stations through the southern end of the East Bay opens pockets for transit-oriented residential and commercial development, unlocking more economic potential for the region.
