The East Bay office market is struggling to adapt to the new realities of the office market. The market has been looking for new footing since the shock of 2020. Tenants looked to the region to grow near San Francisco at a lower cost. As occupier demand dried up across the bay, excess space in the East Bay was no longer needed, and the market's tech, professional services, and life sciences have all given back large blocks of new space. The vacancy rate has reached 15.4%, increasing by more than 700 basis points since the start of 2020 and the highest point in 25 years. This figure is ahead of the national figure of 13.9%, local vacancy is increasing at a faster rate, up by nearly 200 basis points over the past year, compared to a 120 basis point increase nationally.

In 2024, tenants continue to adopt a hybrid real estate strategy and have yet to push employees to return to the office full-time. BART ridership, which services San Francisco and the East Bay, was still 40% below prepandemic figures in January 2024. This effect results from continued moveouts by the market's largest occupiers. Bank of America and Facebook alone gave back more than 500,000 SF in 2023, leading to negative net absorption of -2.3 million SF.

Many of the leases signed before the pandemic have

expired, leading to a decreased proportion of sublease space on the market. Currently, 14% of all available space can be obtained via sublet, a decrease from the high point of more than 20% in 20Q4. The concurrent increase in total availability indicates that rather than leasing, these suites are being returned to the property owner and converted into direct space. There is some optimism among market participants that activity will slowly increase in the second half of 2024 as the last of the pre-pandemic leases expire.

Total availability now rests at 17.6%, up from 10.2% in 18Q2 and 29.9% of the market's 4 & 5 Star inventory is available, increasing by 950 basis points since the end of 2019. The rapid rise in space on the market has put downward pressure on rents, falling by -0.6% marketwide, with comparable figures in all class segments.

The East Bay is expected to struggle for the forseeable future. Property values continue to fall, vacancy is still increasing and some buildings have been going to back to lenders. Some reflief may come when interest rates begin to fall, but likely not enough to have a significant impact on the market.

| Deliveries SF | 101K | 941,215 | 13,393 | 3,951,922 | 2001 Q4 | 0 | 2024 Q1 |
| Market Asking Rent Growth | -0.6% | 2.9% | 0.6% | 27.8% | 2001 Q1 | -13.2% | 2002 Q4 |
| Sales Volume | \$585M | \$1B | N/A | \$2.6B | 2016 Q3 | \$153.6M | 1997 Q4 |

Tenant activity has struggled since the pandemic's start; only two quarters reported positive net absorption since the beginning of 2020, and leasing activity fell to a 25-year low in 2023. The 2.8 million SF recorded during the year was just 43% of the 2015-2019 average. Smaller occupier footprints drive the reduction in leasing activity. The East Bay saw 500 fewer leases signed compared to the pre-pandemic period. At the same time, lease sizes have shrunk by more than 40%; both figures are far greater than national trends. Market vacancy in the East Bay, currently 15.4%, the highest point in more than 25 years. Sourcing tenants has become extremely difficult, and net absorption has fallen to -2.3 million SF, with negative activity concentrated in 4 & 5 Star properties.

Oakland has not been immune to the downsizing and relocating prevalent nationwide. Tenants are taking the opportunity to reevaluate their space requirements. As a result, many occupiers are giving back between one-third and one-half of their space and relocating within the market. Additionally, the demand from tech tenants spilling over from San Francisco has completely dried up, leaving few options to fill the void.

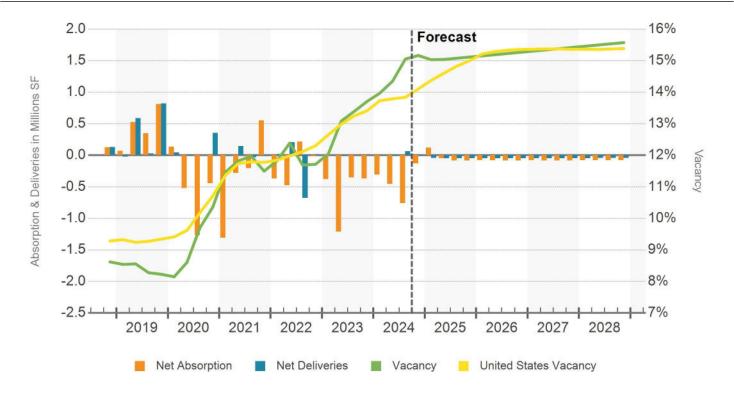

Leases were noticeably smaller in 2023. Since the start of the year, only five leases have signed for 25,000 SF

or more, the largest of which was 50,000 SF. The staffing firm VACO signed that deal in May at 2623 Camino Ramon in San Ramon. Two of the remaining large leases were to medical tenants, as UCSF took 31,000 SF at 3100 San Pablo Ave. in Berkeley, and Delta Dental leased 25,000 SF at 1333 Broadway in Downtown Oakland.

Sublease availability rests at 2.7%, slightly ahead of to the national figure of 2.2%. Most of the space currently hitting the market is direct, as the sublease is comparable to levels in early 2021. More than forty buildings are on the market, and at least 100,000 SF is available. The large blocks of space are a result of the large tenants that had previously occupied the market, a downside of the market's reliance on the tech sector for occupancy, and the 800,000 SF added to the market over the past five years.

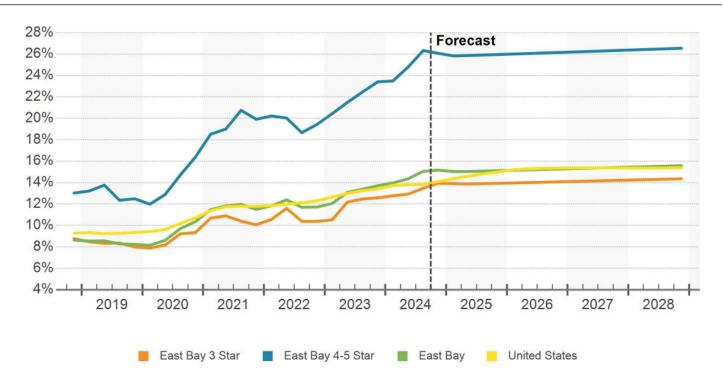

There is little reason to think there will be much change in the near term. Office tenants will likely continue reducing their office footprint until at least 2025. Five-year leases signed in 2019 will not expire until then, meaning occupancy levels are still expected to contract at least until then.

^{*}Renewal

NAIGlobal

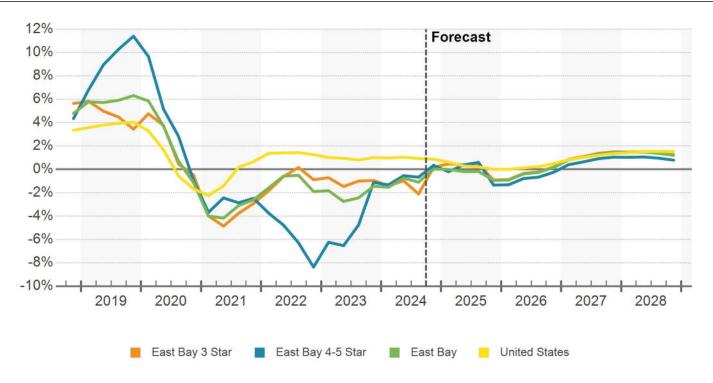

Rents in the East Bay are down year over year, falling by -0.6%. Office rents have been falling consistently over the past few years as tech tenants have closed offices and other users have reduced their office footprints and relocated. At the same time, concessions and lease terms have become increasingly generous for tenants, reaching as high as one month of free rent per year of term and turn-key TI packages in some cases.

Before the pandemic, the East Bay was ranked among the country's strongest metros in rent growth. Vacancy rates were historically low, with robust demand from tenants. The market saw average annual rent growth of 3.8% over the past decade, well above the national average of 2.4%.

Leases in downtown Oakland still command a sizeable premium over the rest of the market. In January, Ramboll signed for 9,200 SF at the 5 Star office building located at 1111 Broadway for \$6.00/SF per month on a full-service gross basis. This is a significant premium over the market average of \$37.00/SF, a 10% premium over the national average. The deal was for seven years and was signed after the space sat on the market for 44 months.

Rents have been falling since the start of 2020 and, according to the CoStar base case forecast, will continue to do so until the end of 2026. Rising availability throughout the East Bay and San Francisco gives occupiers many options for relocation in the region.

Expenses are estimated using NCREIF, Trepp, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

Despite relatively healthy fundamentals over the past decade, developers have been measured in adding new office inventory to the East Bay market. In the years before the pandemic, builders preferred projects in San Francisco and San Jose, where demand and rent growth have been more robust. As a result, East Bay has only added around 4.5 million SF of new office space since 2010. Even adding in the few projects currently under construction, the East Bay has increased its total inventory by just over 4% over the past decade.

As expected, there is no active construction. The most recent project to complete was the Fremont Bank building, a 35,000 SF 4-Star property delivered at the end of 2024. Upon completion, the building was fully occupied and did not impact the market's vacancy or availability rates.

The most recent notable speculative completion was The Key at 12th, a glass tower totaling 320,000 SF that broke ground in 2018 and was delivered in 20Q4. Ellis Partners and Intercontinental Real Estate purchased the development site in March 2017. The University of California's Office of the President preleased 130,000 SF, and Credit Karma has preleased 160,000 SF. Today, the property remains near full occupancy, with only ground-floor retail available for lease.

Office construction will be rare for some time, except for the occasional build-to-suit property. The East Bay market has never been known for large-scale speculative construction, and the vacancy rate of 15.4% is far too high to justify adding inventory to the market anytime soon. Additionally, construction financing costs have risen with interest rates, necessitating higher lease rates than in 2019, when office rents have compressed.

Under Construction Properties

East Bay Office

Properties Square Feet Percent of Inventory Preleased

UNDER CONSTRUCTION PROPERTIES

Office transaction volume during the past 12 months in the East Bay, at \$578 million from 130 transactions, far below the market's 10-year annual average of \$1.5 billion, demonstrating investors are less willing to take positions in the market and the threat of foreclosures have begun to drive market activity.

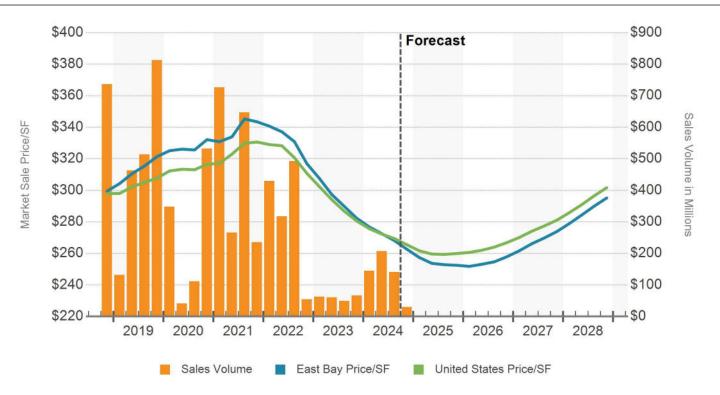

The largest transaction of 2024 was the acquistion of the four-building pleasanton Corporate Commons. Nome Capital Partners paid \$151.8 million (\$254/SF) acquisition of the 596,000 SF.

East Bay saw robust asset price growth from 2013 to 2019, but pricing has faltered since early 2020. Values are discounted compared to both the San Francisco and San Jose office markets. However, rising interest rates

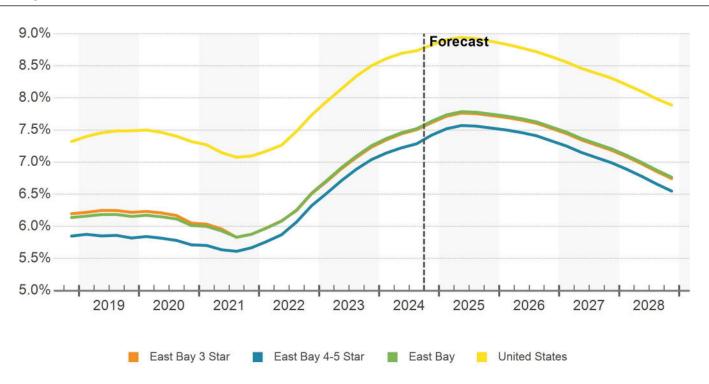

and higher vacancy rates will hamper sales, reducing buyers' willingness to pay for an already high-risk asset class. This will result in some trades below \$80/SF, an unheard-of price just a few years ago.

More pricing erosion is likely in the coming periods. The lending environment is significantly more expensive and difficult to navigate. In addition to increasing interest rates, lenders are wary of transacting on office properties. The trades that are closing require significantly more equity. The office sector has been the hardest hit of all commercial real estate property types. Leasing will likely remain depressed through the end of 2024, resulting in a prolonged recovery for property values.

The East Bay economy has led other parts of the Bay Area in its post-pandemic recovery of population and jobs. According to the Bureau of Labor Statistics, employment in the East Bay metro fell by nearly 180,000 between March and April 2020, or over 15%. To date, employment now exceeds pre-pandemic levels by approximately 31,000 jobs.

Unemployment stood at 4.7% in mid-2024, up around 40 basis points from one year prior. The East Bay rate compares to 5.3% for California and 3.9% for the nation overall. The government, leisure and hospitality, and education and health services sectors have posted the most robust annual gains by percentage across the region, with growth in the 2% to 4% range.

While employment gains pre-pandemic in San Jose and San Francisco were more robust, the East Bay has significantly outpaced national average employment growth. Median income gains have also been substantial. climbing above \$100,000 and significantly outpacing the national average during the recent expansion. The East Bay benefited from the Bay Area's widespread, tech-led economic expansion from the Great Recession. Established tech players such as Workday, Lam Research, and Veeva Systems continued or expanded their East Bay presence. In addition, newcomers like fintech firms Square and Credit Karma and startups like Pleasanton-based 10x Genomics, among others, grew around the metro. Oxford Economics estimates that job growth in the East Bay will continue outperforming the national benchmark by a healthy margin over the next five years.

Outside of the tech sector, the East Bay is home to the

Port of Oakland, one of the busiest ports in the U.S. and a central economic force in the metro. The East Bay is also the largest Bay Area industrial market, and significant distribution tenants like Amazon and UPS have been expanding in the metro recently. The continued rise of e-commerce and the need for warehouse space and last-mile distribution facilities should benefit the East Bay economy and employment market.

The East Bay is home to major research facilities, such as Lawrence Livermore, Lawrence Berkeley National Laboratories, and Sandia National Laboratories. Employment in the healthcare industry includes healthcare systems Kaiser Permanente, Sutter Health, and John Muir Health, along with device and supplier companies like The Cooper Companies and Bio-Rad Laboratories. Tesla maintains a large manufacturing plant in Fremont, a hub for the auto giant's Model S, Model 3, Model X, and Model Y production. The Clorox Company is headquartered in the East Bay, with offices at 1221 Broadway in Downtown Oakland.

BART's ongoing extension from the East Bay to San Jose significantly expands the commuting options for East Bay residents. Job centers in San Francisco, Downtown Oakland, and Pleasanton are becoming even more accessible from the southern portion of the East Bay. Once BART reaches San Jose, East Bay residents can look for work in the Bay Area's three major cities of San Francisco, Oakland, and San Jose. Simultaneously, constructing new BART stations through the southern end of the East Bay opens pockets for transit-oriented residential and commercial development, unlocking more economic potential for the region.
